Lower Columbia Basin Audubon Society

A Chapter of the National Audubon Society

The Columbia Drive Revitalization project

**Membership Meeting
Tuesday, November 24,
2009, 7:00 p.m.
Kennewick First
Lutheran Church,
corner of Yelm and
Highway 395**

The November membership meeting of LCBAS will feature a presentation by Steve Mallory, principal architect for Arculus Design and Technical Services, an Architecture/Engineering firm located in Kennewick. Arculus is working with the Port of Kennewick on the Columbia Drive Revitalization project.

The Port of Kennewick commissioned Arculus to create a conceptual master plan with supporting documentation for revitalizing the 14-acre area along the North side of Columbia Drive bounded by the Cable Bridge and Clover Island Drive, and Columbia Drive to the river, including Duffy's Pond and Catfish Island. The plans that were produced have been presented to many groups. Tim Arntzen of the Port of Kennewick charged Arculus with making plans that remove "the blight and

revitalizes the shoreline, provides amenities that are currently not available in downtown Kennewick, energizes the area with more upscale living and destination activities, and provides a mixed-use area for all to use, work and enjoy."

Members are encouraged to attend this meeting. Please bring cookies or other snacks if you are able to do so. Winter is coming and sometimes delicious snacks can motivate us to leave our warm homes to attend a meeting!

President's Message from Ed Rykiel, Chapter President

Every Membership Counts

Have you ever heard someone say, "I'd join your Audubon chapter but I can't attend the meetings and I don't have time for the birdwalks, so I wouldn't contribute much."? If so, did you have a response?

Becoming a member of LCBAS means that you are contributing to the Audubon

goals of conservation and education even if you never attended a single meeting. Our members are the force that powers all our programs and allows to have a say in what happens in our community. Your membership makes our Junior Audubon happen. Your membership allows us to attract speakers for our monthly program.

Everything that LCBAS is able to do in our local area depends on your membership. And most importantly, your membership helps us demonstrate that LCBAS represents a strong voice for conservation and environmental education in Benton and Franklin counties. A few examples of your influence. LCBAS was among the VIP guests at

President's message *Continued*

the recent dedication of the McNary Environmental Education Center and received credit for its role in starting the Center. The Tri-Cities Visitors and Convention Bureau has created a Birding category to include in their literature and on their website, and LCBAS is the only listing in that category. LCBAS represented environmental interests and participated on the Community Resource Team for the West Columbia Park development plan. LCBAS

has been asked to participate in the Columbia Drive Revitalization project. I could go on but I hope you see how important every membership is.

So the next time you hear someone say, "I would join, but ... "; engage them in a friendly manner and let them know how important their membership is. Everything we accomplish and any clout we have is because you cared enough to join LCBAS.

Happy Thanksgiving to all!

LCBAS Member Nancy LaFramboise leads a presentation on the taxidermy collection housed at the new and improved McNary Environmental Education facility

McNary Environmental Education Center Grand Opening a success with help from LCBAS members and Refuge Friends Group!

Snap! With oversized scissors, the U.S. Fish and Wildlife Service Regional Director, Robyn Thorson, officially opened the Mid-Columbia River National Wildlife Refuge Complex Headquarters and Environmental Education center. The impressive new center consists of a 1800 square foot building housing a large classroom and a 350 square foot display area, reception desk, offices, small kitchen and restrooms.

The official ribbon cutting was followed by a public open house on Saturday October 10, 2009. The open house

attracted nearly 500 visitors and these visitors were guided on bird walks, and through the education center and introduced to many wonderful taxidermy specimens by members of LCBAS! This opening event could not have been possible without the help of LCBAS and members of the refuge Friends Group. A wonderful experience was had by everyone who visited, and Refuge staff could not have handled all of the interest by the public without the support of partners like LCBAS!

Help for Injured Raptors:

If you find an injured raptor in the Tri-Cities or surrounding area you can call a local volunteer for advice. Injured raptors are usually transported to **Blue Mountain Wildlife in Pendleton, Oregon** for treatment and rehabilitation.

Who to call:

Michelle Caron..(509) 366-0888
Marilyn Hayes..(509) 521-4648
Suzanne Baird...(509) 460-2434
Blue Mountain Wildlife...(541) 278-0215 see **Lower Columbia Basin Audubon website** and click on the **Help for Injured Birds** link.

Bird Watching Tip of the Month! Count the flock: or at least look at each individual – find the different one – the number isn't the goal. It's nice to track numbers but the exercise of picking out the different one will pay off.

Conservation Notes *with Rick Leumont*

Hanford Lands:

The Department of Energy is in the process of reviewing its land holdings nationwide in an effort to determine if any can be declared excess and transferred to other government agencies or offered for sale to the public. Hanford lands are currently under review.

This process presents us with an opportunity to further protect Hanford's incredible shrub-steppe habitat and also possesses a threat that these lands will be allowed to be converted to industrial or agricultural use destroying wildlife habitat and native plants.

The Final Hanford Comprehensive Land Use Plan issued in September 1999 designated tens of thousands of acres of Hanford to be managed for the preservation or conservation of Hanford's fish, wildlife and native plant habitat.

When President Clinton established the Hanford Reach National Monument in 2000, he realized that literally thousands of acres of Hanford lands

deserved the protection of Monument status but were essential to the Department of Energy's cleanup and restoration mission. President Clinton directed the Secretaries of Energy and Interior to work together to manage these lands for preservation and eventual transfer to the Monument.

We have written the Department of Energy calling, in the strongest terms possible, for the following actions during this review of land needs:

1. Intensify the partnership between the Departments of Energy and Interior to manage Hanford lands for wildlife.
2. Transfer to the Hanford Reach National Monument all excess DOE Hanford lands designated for preservation and conservation management under the Final Hanford Comprehensive Land Use Plan of 1999.
3. All Hanford lands under consideration for designation as excess must be reviewed by both Departments of Energy and Interior and US Fish & Wildlife Service to determine

there suitability for inclusion in the Monument.

4. Any Hanford lands determined to be excess or surplus must be offered to the Department of Interior for inclusion in the Monument prior to transfer to any other agency, government or entity either private or public.
5. We request inclusion in discussions and/or studies to determine what Hanford lands may be excess.

We have also submitted a resolution to the Audubon Council of Washington echoing our demands on behalf of all Audubon chapters in Washington. We expect this resolution to be endorsed by the Audubon Council within a few days.

We will keep you posted this process.

"This process presents us with an opportunity to further protect Hanford's incredible shrub-steppe habitat."

New Binoculars *submitted by Cherie Baudrand*

Lower Columbia Basin Audubon Society (LCBAS) has purchased new binoculars to share. Five Nikon Monarchs will be available to check out to adults on the First Saturday Bateman Island Bird Walks. Two guests enjoyed using them on the October bird walk.

Barbara Clarke did the leg work getting a great deal from Nikon. They are good quality binoculars, and they will help new birders be more successful seeing birds. Twenty Nikon Trailblazers were purchased to be used for Junior Audubon and Teen Audubon outings. They will also be available for LCBAS members to check out on school field trips. Thank you LCBAS.

Bird Sightings – October 2009

Kevin Burke - (wildburke@hotmail.com)

“The ducks have started to come back and the shorebirds have hung around for folks to get a great look.”

Bird Sightings Greetings

Hello everyone! We have had another great month of birding in our area. I would like to thank all of the folks that posted bird sightings this month. This column would not be possible without the motivation and passion of all of you. We picked up right where we left off from last month with a lot of great sightings. The ducks have started to come back and the shorebirds have hung around for folks to get a great look.

October:

1. Oct. 2nd: A Golden-crowned Sparrow was seen at the home of (NL).
2. Oct. 3rd: A Red Phalarope and Buff-Breasted Sandpiper were located at the Walla Walla Delta by (M&MLD) and (MWO) respectively.
3. Oct. 3rd: A Sabine’s Gull and Peregrine Falcon were seen at the Yakima Delta by the folks on the Bateman Island bird walk.
4. Oct. 3rd: A second Buff-Breasted Sandpiper was observed at the Tyson Sludge ponds on Dodd road by (NL, BL, M&MLD, and MWO).
5. Oct. 4th: A Pacific-Golden Plover, and American-Golden Plover were observed at the Tyson Sludge ponds on Dodd road by (NL, BL).
6. Oct. 5th: A Lazuli Bunting was seen at a feeder near Two Rivers Park (DR).
7. Oct. 5th: The Buff-Breasted Sandpiper(Dodd Road) , Red Phalarope(Walla Walla Delta), and Pacific-Golden Plover(Dodd Road) were all still present. Posted by (NL).
8. Oct. 5th: A Trumpeter Swan, Pectoral Sandpiper, 3 Black-bellied Plovers, American Pipit, Long-billed Dowitchers, and Peregrine Falcon were seen at the Yakima Delta by (GM).
9. Oct. 5th: Black-necked Stilts were seen at the Yakima Delta by (JL).
10. Oct. 5th: An American Avocet, Black-bellied Plover, Pectoral Sandpipers, Long-billed Dowitchers, Western Sandpipers, Western Grebes, and a Common Loon were seen at the Yakima Delta by (JL and NL).
11. Oct. 7th: An Orange-crowned Warbler was seen in a magic brush pile in the yard of (JL).
12. Oct. 8th: That same magic brush pile produced a Hermit Thrush seen by (JL).
13. Oct. 8th: A White-throated Sparrow was seen in the yard of (NL).
14. Oct. 8th: A Wild Turkey was seen in the yard of (LF) in Richland.
15. Oct. 8th: A Harlequin Duck was seen at the Hood Park swim beach by (LF).
16. Oct. 12th: A Violet-green Swallow was seen on the Yakima Delta, a late record for this bird, by (JA&LH).
17. Oct. 15th: An Evening Grosbeak was seen at the shelf feeder of (Mary L) in N Richland.

October Bird Sightings *continued*

18. Oct. 16th: A Northern Shrike was seen on the back side of Rattlesnake Mountain on Crosby road by (RL).
19. Oct. 17th: A Surf Scoter, Greater Yellowlegs, Lesser Yellowlegs, Dunlin, Least Sandpipers, Western Sandpipers, Black-bellied Plovers, Pectoral Sandpipers, Long-billed Dowitchers were seen at the Yakima Delta by (BL&NL).
20. Oct. 17th: A Lincoln's Sparrow and a Winter Wren were seen at W.E. Johnson Park by (LH).
21. Oct. 18th: A White-throated Sparrow was seen at the feeder of (NL).
22. Oct. 19th: A Burrowing Owl and A family of Chukar were seen on Nine Mile Canyon Rd. and Beck Rd. respectively by (RL).
23. Oct. 19th: A Golden-crowned Sparrow was seen at W.E. Johnson Park by (NL).
24. Oct. 19th: 3 Hooded Mergansers, a Baird's Sandpiper, Black-necked Stilt, Merlin, 17 Snow Geese, 4 Bonaparte's Gull's, and a Greater Scaup were seen along the Columbia Park Road and Bateman Island by (NL & BW).
25. Oct. 20th: A Rough-legged Hawk was seen on ALE by (JB)
26. Oct. 24th: Many Pectoral Sandpipers, 3 Baird's Sandpipers, and a Black-bellied Plover were seen at the Dodd Road Tyson Sludge Ponds by (KB), and again on Oct. 25th by (KB & JB).
27. Oct. 25th: A Swamp Sparrow was seen on Bateman Island by (GM & NL).
28. Oct. 26th: A Northern Shrike was seen at a feeder at the home of (J).
29. Oct. 26th: An Anna's Hummingbird was

seen at W.E. Johnson Park by (NL & KC).

Observers:

(LH) Lisa Hill, (JA) Jane Abel, (JB) Jennie Bradbury, (KB) Kevin Burke, (NL) Nancy LaFramboise, (BL) Bill LaFramboise, (RL) Ron Louderback, (MD) Mike Denny, (MLD) Merrylynn Denny, (MWO) Michael Woodruff, (KC) Kathy Criddle, (J) Judith, (GM) Guy McWethy, (JL) Jim Lehmann, (LF) Lucie Fritz, (JL) Jordene Lucas, (Mary L) Mary L, (BW) Bob Woodley, (DR) Dennis Rockwell

Junior Audubon *with Cherie Baudrand*

We were happy and excited to welcome nine new members into Junior Audubon at the after-school meeting November 2. The 22 Junior Audubon members in attendance learned a little about John James Audubon and Roger Tory Peterson. Audubon's dream was to make a book with life size paintings of all the birds in North America. It took a long time, but he never gave up. The huge, 103 x 69 centimeters book, the first of its kind, was published in 1827, and sold for \$1000. In 1987, one of the original books sold for nearly \$2,000,000. We wondered how he made a Great-blue Heron fit in the book. Duncan guessed that he painted in with its neck folded and head down. We found the painting of the heron, and yes, that's what he did.

Roger Tory Peterson was also a painter. He was a Junior Audubon member when he was eleven years old in New York, and paid 10 cents to join. That experience painting a bird in Junior Audubon began his career. With the inspiration of these two artists, the Junior Audubon members sketched a carved bird. There are some budding artists in the group. Members were great at identifying silhouettes of birds from Peterson's Field Guide. We looked at bird beaks, and members got to pick up a gummy worm with their stick beaks.

We are planning another "Going Ducky" outing this winter, being citizen scientists and helping with the Great Backyard Bird Count in February, and celebrating the International Migratory Bird Day in May. We are also planning an outing to look for Bald Eagles in January.

Thank you to Barbara Clark, Marilyn Hayes, Chris Simonen, Jack and Murrel Dawson for helping with 22 enthusiastic junior birders.

Annual Christmas Bird Count on January 2, 2010

This year's count will be held Saturday, January 2nd. This count, which has occurred nationally for 110 years, and locally for nearly 40 years, is done in over 1,900 locations around the United States and nearby countries and involves over 60,000 volunteers. The data that all these counts produce becomes part of the largest wildlife database in the world and is vital for determining the status of expanding and declining bird numbers. **Anyone that enjoys looking at birds can help.**

Ray Johnson (509-521-5971) will lead the Richland team this year, while **Tom and Barb Clarke (509-539-0857)** will lead the Pasco team and **Kevin Burke (240-422-9483)** will lead the Kennewick team. Please call them to participate in their area.

All Christmas Bird Counts are standardized to a 7.5 mile radius circle (about 177 square miles). The LCBAS count circle is registered as the Washington Tri-Cities Circle and centers on the Columbia River just off shore near the end of Road 68 in Pasco. This is a very large area that includes Selph landing Road in Pasco, most of Two Rivers Park east of Kennewick and Badger Mountain in Richland.

The Tri-Cities count starts in three locations at 7:30am, January 2nd. Although some hardy souls may do some owling at the official start time of 12:00am midnight. The three start locations where volunteers can start are:

Richland – The “Fingernail” in Howard Amon Park

Kennewick – Audubon Nature Trail in Columbia Park

Pasco – Chiawana Park Boat Ramp

From these locations we split into smaller teams led by more experienced birders. Some birding skills are nice but not required. If you can not make the 7:30am start please coordinate with your count leader prior to Saturday January 2nd to arrange an appropriate time and location. The team leader also needs to know your tallies before the potluck.

The Tri-Cities count also one of the best supported counts in the state, and regularly has the highest number of species seen inland. All of this is due to strong community support. Our goal is to count as many birds within the circle during the day (24 hrs). To do this, we need as many teams as possible. If individuals can only participate for part of the day, it will still help. There can be a fair amount of walking

involved, so keep this in mind when making plans. But much counting will be done from car windows for those that prefer that form of participation. Birds seen at bird feeders within the count circle are just as important to the count.

At the end of count day, the LCBAS has their annual Christmas Potluck. The dinner is now held at the Columbia Grange #938, 6300 Court Street, Pasco. Additional information on the dinner will be provided in the December issue of the “Curlew” newsletter. Also the Grange will be open all day for those that would like to stop by for warm drinks and discuss what they have seen.

You do not need to be a member of the Audubon Society to help, but a \$5.00 donation is expected of each participant age 19 and above to help defray the cost of maintaining the database. It would be greatly appreciated that those participating would make the \$5.00 donation at the 7:30am start.

The information that all counts generate is reviewed and placed in a database that is available to everyone on the Internet. The database can be accessed through www.birdsource.org, then selecting the Christmas Bird Count icon. The Tri-Cities Count code is WATC.

For more information on the Tri-Cities Christmas Bird Count, please contact Dana Ward at (509) 545-0627.

Teen Audubon Update with Jennie Bradbury

On Sunday October 25th, Teen Audubon met for the second time. This time we met at the Richland Community Center and expanded the age range to include ages 11-18. The meeting featured an educational session on owls, complete with owl adaptation dress-up, taxidermy, and a trivia game. After we went outside and tried out our new binoculars and did some bird watching. Our attempts to call in owls were unsuccessful, because it was not dark enough. We were very happy to have a slightly better turnout than last time with 3 youth and 5 adults attending the meeting.

Our next meeting will also be at the Richland Community Center's lounge on the last Sunday of the month: November 29th, from 3-5 pm. Since November is a great time of year to look at ducks, we will be learning about waterfowl and hopefully get good looks at lots of birds on the river. If you are interested or know someone who may be interested in joining Teen Audubon, please come to our next meeting. For more information contact Jennie Bradbury: 509-942-8184, jennifer_bradbury85@yahoo.com.

Book Table Talk *with Kathy Criddle*

Shopping at our Book Table this month will be a great way to save some money and support your local Audubon Society. We will have some great bargains with gently used books on one end of the table. On the other end, there will be lots of the new but classic ID birding, wildlife and plant books to choose from.

Be prepared to purchase the latest **Watching Western Warblers DVD** which should arrive just in time for the November and December Book Table. Highlights this month focus on a few classics.

Beginning birders will enjoy the Peterson Field Guides workbook, Finding Your Wings by Burton Guttman. This book is filled with information, activities and quizzes which cover the basics and then some to help you learn the art of bird watching. Bargain price is \$6.00.

The Field Guide to Western Birds, third edition, is written by Roger Tory Peterson. Coined "The Birder's Bible" for over sixty years and one of the cornerstone guides in the Peterson Field Guide Series, it is one of those classic guides every birder should have in their collection. Price is \$19.95

For the very serious birder, we have the ABA Birdfinding Guide, A birder's Guide to Washington by Hal Operman with contributions from members of the Washington Ornithological Society. This is the book to have in your car when you embark on a birding adventure. Text, maps and mile-by-mile descriptions of what to see, where and when, will increase your bird sightings and decrease expensive wasted fuel! Price is \$29.95.

Stop by the Book Table and check these out. We are able to buy most of our books at a discount price, so buying at the Book Table helps LCBAS raise money for our many conservation and education projects. If you are not able to attend a meeting then

check out our website at <http://lcbas.org/> to find information on purchasing Book Table books from home.

Special Book Table Talk Note: Ginger Wireman, author of the delightful children's story "If wishes had wings" will be at the Book Table in November to sign copies of her latest book. Be sure to stop by for this special event! Great Christmas present for young imaginations!

Blue Earth Films has finally completed Watching Western Warblers!!!!!!!!!!!!!!

Some members may not have been members when we featured the DVDs of Blue Earth Films in the past. Michael Male and Judy Feith are the film makers and they have done a terrific job on past DVDs (Watching Warblers, Watching Sparrows, and Watching Waders) and have filmed for National Geographic, Nova, Planet Earth (Red Crossbill segment) and more. We have sold a lot of their DVDs. They are spectacular. There are video clips on their web page <http://www.birdfilms.com/index.html> (click on the name of the video and then on the bird). This DVD would make a wonderful holiday gift for birders!

Check out our website: <http://lcbas.org>

Wolves in Washington

Jennie Bradbury and John McLaughlin

On Wednesday night (10/21/09), we attended a Public Scoping Meeting for the new Environmental Impact Statement for Washington Wolf Conservation and Management. This meeting at Battelle Auditorium in Richland, was hosted by the Washington Department of Fish and Wildlife, who along with a wolf working group, drafted the plan. Basically, gray wolves are naturally moving back into Washington and the State is developing a plan to conserve and manage them. Currently wolves are listed as "Endangered" in Washington. This new plan sets the criteria for delisting wolves, including four alternative management plans. The main differences between the alternatives are protection levels, management options to address livestock predation, and interactions with deer and elk.

The preferred plan is Alternative 2. Under this alternative, once there are 15 successful breeding pairs, gray wolves will be delisted in Washington. If wolves are delisted, they will no longer receive protection from the State Endangered Species Act and will be managed like other non-listed species in Washington.

Many interested parties attended the meeting, including ranchers, hunters, and concerned citizens. Many were concerned that wolves would pose a threat to livestock as yet another predator and reduce deer and elk hunting opportunities. Citizens recorded official statements including opinions of the proposed plan and stories from other neighboring states that have recently experienced wolf population growth and related management challenges.

What struck us as an area of great misunderstanding at this meeting was the misconception that humans are reintroducing wolves back into Washington. Wolves are NOT being reintroduced; they are coming back on their own. As of 2009, there are two confirmed packs of wolves in Washington: one in Okanogan/Chelan Counties and another in Pend Oreille County. These wolves likely moved in from Canada and Idaho, where wolves are more numerous. "There are also indications of a pack in the Blue Mountains and a few solitary wolves in other scattered locations," (WA Fish and Wildlife).

"Currently wolves are listed in the state and until they are delisted there are really no options to control. They are coming and we cannot stop that, we are trying to create a proactive plan to address the issue now and create a credible plan for delisting so that if you need to deal with a problem you can, under the law," (Jeff Tayer, Region 3 Director of WA Fish and Wildlife).

The LCBAS Bird Seed Sale and Information Day on October 17th was a success!

with Jordeen

Lucas

Bags and bags of bird seed in the back storage room of Columbia Grain and Feed dwindled quickly throughout the morning. The taxidermy display, arranged by Nancy LaFramboise, drew in many curious and interested customers.

It was great getting to interact with old and new birders and answer their many questions. We not only shared with others, but but we received many ideas as well. One lady in particular caught my attention, she took materials home with her so she could give her grandchildren Audubon memberships for Christmas. I thought this was a great new way to spread new interest in nature and outdoor activities.

Both Columbia Grain and Feed and LCBAS benefited from the annual seed sale. Remember to mark your calendars for next year for this seed sale event. - I know I will! And Remember – Anytime that you buy seed from Columbia Grain and Feed you can mention that you want a portion of the sale to benefit Audubon!

McNary Environmental Education Center Second Saturday Event!

Open to the Public! On December 12, 2009 join the Refuge Friends group and complete a census of the waterfowl on the pond! **How to get there:** The Education Center is located off Highway 12 near Burbank. From Tri-Cities take Highway I-182 East/Highway 12 East to Burbank. Turn left onto Humorist Rd. at second stoplight after the Snake River Bridge. Turn left onto Lake Rd. Look for Education Center on the left.

Audubon Membership Information

Please Note: Membership in National Audubon Society (NAS) and the Lower Columbia Basin Audubon Society (LCBAS) are **separate memberships**.

LCBAS Chapter Membership (includes a year's subscription [10 issues] to *The Curlew*)

_____ \$20. for annual membership dues or

_____ \$10. for full time students.

Please make check payable to **LCBAS**. I can help with an additional donation of \$_____

_____ Send *The Curlew* to my email address listed below. All my dues will go towards supporting LCBAS in local education and conservation efforts.

_____ I want to be on your Environmental Alert e-mail list to receive timely notices about issues/work parties. (Your e-mail address will not be shared.)

National Audubon Society Membership (includes annual subscription to *Audubon Magazine*)

_____ \$20. for one year new membership in the NAS. (Renewal of NAS membership is currently \$35.)

_____ \$15. for one year new senior or full time student membership in NAS.

Please make check payable to **National Audubon Society, PO Box 422250 Palm Coast, FL 32142-2250**

Please do not send renewals for NAS to LCBAS.

For any of the local options above check the appropriate boxes, clip the form and mail it with your check(s) to:
